Citizens Air Complaint Program

Idling emissions from gasoline and diesel motor vehicle engines are known contributors to health impacts, including asthma and cardiovascular harm. Idling for longer than three minutes is illegal.

If you would like to receive a reward for your enforcement efforts, you can also participate

in our complaint program, which lets you file and track complaints online and see every decision that is made about them.

1. Questions and comments submitted by email will be answered in ten business days.
2. Submissions are reviewed by at least two reviewers, including a supervisor, before a decision is made.
